

# Systems Manual

Developed by Allen Cai, Jin Zhang, Nick Kirtsos, Richard Lam

## Minimum Hardware Requirements

### Operating System

Windows, Mac

### Browser

Google Chrome, Mozilla Firefox,

Note: The game does not work for Internet Explorer.

## Installation guide

If we were to launch a web server in the near future, then proceed to the server. Otherwise, download the files from GitLab <https://gitlab.cci.drexel.edu/fds20/697/-/tree/master>. Make sure to download every file listed. Once files have been downloaded, make sure each file is contained within the same folder. Open the folder and locate the file labeled “index.”

 index.html	5/29/2020 10:15 AM	Chrome HTML Do...	17 KB
---	--------------------	-------------------	-------

Double-click the file to open it, and it should open with your default browser (Preferably Google Chrome).

## Basic Troubleshooting/Errors

### Unable to open “index.html”

If unable to open the index HTML file, right-click the file. Click “Open with” and select google chrome (Or open with any of the browsers listed in the minimum hardware/software section).

### Other

If a problem or bug occurs, try refreshing the page. If all fails and any problem persists despite refreshing the page, proceed to the contact information and reach out to one of the developers.

## Contact Information

In the case of an undocumented question or error, contact any of the following emails.
